RE: 2027 Summer Intern – Motorsports Aerodynamics & Aero-Thermal Engineering (JR-202620069 / JR-202619861)

Dear Hiring Manager,

I am interested in the Motorsports Aerodynamics Intern and Motorsports Aero-Thermal Engineering position at GM because it combines my passion for motorsports with the engineering behind high-performance vehicles.

I have strong experience in Siemens NX/Teamcenter, mechanical design, and hands-on fabrication. Through Baja SAE, Aero Design SAE, and my role at the Laboratory for Laser Energetics, I have designed, prototyped, tested, and iterated mechanical systems. I have applied CFD, FEA, Python automation, and first-principles analysis to engineering problems, while utilizing my experience in CAD development, machining, and additive manufacturing.

I am drawn to GM Motorsports' role in developing technologies that not only push the limits of performance on the track but also carry over to production vehicles. As an avid motorsports fan, I want to contribute to aerodynamic development across GM's racing programs.

Thank you for your time and consideration.

Sincerely,
Erick Begishev
